I owe Suburban a call, the days get away when having fun. The attorney in our WV case sent an 18 page letter to all the agencies laying out his version of our sins, attached 100 of our documents, e.g. folks drinking our chemicals. Press has yet to pick it up, but only a matter of time. I can tell my clients "I told you so", but that is small pleasure, pretty sad they are so clueless - guess they think folks like to drink our stuff.
